Jadoo Power in the 2008 SARTA Tech Index for the 6th Year

Folsom, California, March 24, 2009

For the 6th consecutive year, the Sacramento Area Regional Technology Alliance (SARTA) selected Jadoo Power as one of the region's top 50 high tech companies.

"The Sacramento Area Regional Technology Alliance (SARTA) is pleased to recognize and celebrate the success of the 50 companies that have earned a place on the 2008 SARTA Technology Index. These companies are leading the growth of the area's technology economy. In fact, the growth segment of our high-tech economy has expanded by more than 34 percent in the past year (Q3 2006 – Q3 2007), as measured by the Tech Index", stated SARTA CEO, JD Stack in the Sacramento Bee on March 19th, 2008. "Today innovation plays a central role in the future growth of practically every aspect of our regional economy. As corporations make long-term and far-reaching decisions for the investment of capital, the technology sector has proven to offer hope and excitement for the prospect of vibrant, resilient economic growth."

3rd Quarter 2008 Results

The SARTA Technology Index grew by 5.74 percent in the third quarter of 2008. Stock prices at regional publicly-traded companies were mixed, but grew on average. In addition, employment numbers continued to slide, showing a net decrease of sixteen employees across the private companies on the Tech Index. Private equity investment activity significantly outpaced both the previous quarter as well as the dollars raised by startups during the third quarter of 2007. About the SARTA Tech Index™

As part of its mission to foster high tech entrepreneurial growth and attract private investment capital to the greater Sacramento region, SARTA has developed an innovative tool, the SARTA Technology Index™, to monitor the health and status of the region's technology sector. Just as the S&P 500 acts as a bellwether for corporate America, the SARTA Technology Index™ is a barometer of how technology companies in the greater Sacramento region are performing.

Today, there are national and international indices of technology companies, but to our knowledge, this is the first regional index ever to be developed. The Index includes public and private technology companies headquartered in the greater Sacramento region.

The numerical value of the SARTA Technology Index™ is based on a proprietary formula that tracks three financial metrics: revenue, employees and equity capital raised. The Index was set to 100.00 at its initiation and is updated on a quarterly basis.

About SARTA

The Sacramento Area Regional Technology Alliance (SARTA) is a tech-focused 501(c)(3) corporation that supports entrepreneurial programs, companies and technology investment throughout Butte, El Dorado, Nevada, Placer, Sacramento, Solano, Sutter, Yolo and Yuba counties.

SARTA's mission is to accelerate the growth and development of technology companies and the technology sector in the Sacramento region. Through its partners, SARTA connects and provides resources for the region's high-tech entrepreneurs, investors, business, non-profit, economic development and community leaders, supporting its goal to attract \$1 billion in investment capital to the region. SARTA also provides high-tech entrepreneurs, executives, and other business and community leaders with connectivity and resources for growth, networking, and educational opportunities.

SARTA is directed by a 40+ person board of directors composed of regional leaders of academic institutions, investment groups, business associations and technology corporations that seek to foster technology innovation and growth in the Northern California counties of El Dorado, Nevada, Placer, Sacramento, Solano, Sutter, Yolo, Yuba and Butte. For more information, go to www.sarta.org.

About Jadoo Power

Jadoo Power is an industry leader in fuel cell technology and hybrid alternative power systems. Founded in 2001, Jadoo Power is grounded in technical expertise, product development and strategic partnerships.
