ASSEMBLYMAN ROGER NIELLO VISITS JADOO POWER FOR A LOOK AT THE FUTURE OF FUEL CELL ENERGY

For Immediate Release

Folsom, California, March 25, 2009 – Assemblyman Roger Niello spent a morning with Jadoo Power recently to get a first hand look the Folsom, California company's latest technologies. The visit is part of his overall effort to ensure the region takes a leadership role in reviving the local economy with advanced technologies and job growth.

Assemblyman Niello met with Leonard Devanna, Chief Executive Officer of Jadoo Power, and several members of the Jadoo Power team for a tour of their facility, fuels laboratory, manufacturing floor and a demonstration of some of the power products they have delivered in the past eight years.

"We were extremely pleased that Assemblyman Niello was able to take time in his busy schedule to visit us," Mr. Devanna said. "We appreciate his interest in our products and his efforts to make the region a clean-tech leader."

Jadoo Power develops and sells alternative hybrid energy solutions for the portable power markets. The company's patented technologies combined with its modular architecture enable the integration of advanced fuel cell and fuel technologies into better power products. The fuel cells provide reliable, safe and efficient power in a variety of applications, including remote fire detection, surveillance in forest areas, back-up power, and military applications including unmanned aerial vehicles. Their latest product will deliver a better power supply for emergency rescue medical devices enabling a more efficient, lighter weight, and cost effective solution.

"Jadoo Power is an innovative company that is working to provide alternative energy sources for a variety of uses in the public and private sectors. I'm excited that a company such as Jadoo has chosen to call Folsom its home and I believe it is companies like Jadoo that will lead our state's economic recovery," said Assemblyman Niello.

About Jadoo Power

Jadoo Power is an industry leader in fuel cell technology and hybrid alternative power systems. Founded in 2001, Jadoo Power is grounded in technical expertise, product development and strategic partnerships. They deliver best-in-class hybrid fuel cell power solutions to commercial, business and military customers. Jadoo Power's industry strengths include hybrid power systems and fuel solutions. They continue to lead the market in balance of plant technology, hold patents in fuel management and power systems and continue their advancements in better fuels, storage and fuel delivery, a critical component of the hydrogen economy.
