IACP BOOTH # 1144

**JADOO TEAMS WITH NETWORK ENVIRONMENTAL SYSTEMS TO
INTRODUCE FUEL CELLS FOR LAW ENFORCEMENT**

**Jadoo Demos New Fuel Cell Products for Surveillance, Remote Emergency Assistance, and
Back-up Communications Power at IACP Forum**

Folsom, CA – October 9, 2006 – **Jadoo Power Systems Inc. (Jadoo)** www.jadoopower.com, the leading supplier of portable fuel cell systems, announced today that they will be partnering with **Network Environmental Systems (NES)** at the upcoming 113th Annual **International Association of Chiefs of Police Conference (IACP)**, on October 14th in Boston, Massachusetts. The latest products from Jadoo, including the recently announced **XRT**, will be on display in the NES booth (Booth#: 1144).

The Jadoo Power **XRT** provides **critical power for law enforcement** applications, such as surveillance, remote or “off-grid” emergency assistance, and back-up communications power support.

Supporting Jadoo’s **N-Gen fuel cell power unit and N-Stor fuel storage canisters**, the Jadoo **XRT weighs only 50 pounds, but provides the energy of four 45 Amp-hour batteries** that weigh over 100 pounds. A mobile, rugged fuel cell power package, the XRT can be configured to deliver application runtimes well beyond that of standard deep-cycle, marine batteries.

A fully-configured XRT includes:

- Six N-Stor360 fuel canisters, providing **2200 Watt-hours (180 Amp-hours) of runtime**
- One **100 Watt N-Gen** fuel cell power unit
- **110 VAC and 12 VDC outputs**
- Hot-Swap capability, allowing for continuous, uninterrupted operation
- Easy-to-use digital “state-of-fill” indicator to identify remaining runtime

“NES has been working within the law enforcement community for years,” said Jack Peterson, VP of Sales and Marketing at Jadoo. “Their opinions, comments and recommendations are well respected by those that attend their training classes and employ them as consultants. Jadoo is excited about having NES promote the advantages of fuel cell technologies to their customers.”

Jadoo products and accessories are currently sold to first responders, military and consumers, where having power where and when you want it is a priority.

“NES is all about being prepared,” said Jerry Bucklin, President and CEO of NES. Whether having the right training or having the right equipment, law enforcement personnel need to know

and understand what is available. We are proud to be an authorized representative of the Jadoo line of fuel cell power solutions.”

About Jadoo Power Systems

www.jadpower.com

Jadoo Power Systems, Inc. is a market-focused company that develops and sells next-generation, portable energy storage and power generation products. Jadoo is the largest supplier of fuel cell products to the portable power space. Jadoo is financed by Mohr Davidow Ventures, Venrock Associates and Sinclair Ventures, a wholly owned subsidiary of Sinclair Broadcast Group, Inc.

About Network Environmental Systems

www.networkenvironmental.com

Network Environmental Systems Inc., (NES) is known nationally and internationally for environmental health and safety training and is the industry leader on Clandestine Laboratory Drug Safety Training.

NES was instrumental in developing the U.S. Department of Justice/Drug Enforcement Administration Clandestine Laboratory Safety Training Program. On an annual basis NES teaches approximately 38 weeks a year in Quantico and since 1988 we have trained over 23,000 Clan Lab personnel throughout the United States, Canada and Jamaica .
