**JADOO POWER TO SHOWCASE AWARD-WINNING  
XRT™ & N-GEN™ FUEL CELL POWER SYSTEMS AT  
SHOWSTOPPERS CES 2007**

**CES Innovations Honoree and *Electronic Products* 2006 Product of the Year**

Las Vegas, NV, January 3, 2007 – **Jadoo Power Systems Inc.** (Jadoo) [www.jadoodpower.com](http://www.jadoodpower.com), the leading supplier of portable fuel cell systems, announced today it will be showcasing their award-winning **XRT** and **N-Gen** fuel cell product lineup at the **Consumer Electronics Show (CES) during ShowStoppers CES 2007** on Monday, January 8, 2007 at 6:00 PM at the Wynn Hotel in Las Vegas.

Honoree of the prestigious **International CES Innovations 2007 Design and Engineering Award** and winner of ***Electronic Products Magazine* Product of the Year**, the XRT and N-Gen fuel cell products provide essential alternative clean power for a variety of power-hungry applications when the **grid is either unavailable or unreliable**. For example, during the Katrina Hurricane disaster when legacy battery and generator technology failed, Jadoo fuel cell technology was available to power **critical emergency radio communications, law enforcement surveillance products, remote satellite phones, modems, walkie-talkies, and laptops**.

The N-Gen and XRT provide **100W at 110VAC/12VDC of rugged portable fuel cell power**. Utilizing Jadoo's patented N-Stor™ Fuel Cell Canisters, multiple fuel runtime options are available. The Jadoo N-Stor360 can provide 360W-h (30A-h) of predictable continuous runtime and there is no degradation or memory effect as with standard batteries. When used with the XRT, **N-Stors can deliver upwards of 2200W-h (180A-h) of runtime**. Weighing **only 50 pounds**, the XRT can deliver the equivalent energy of standard gel-cell batteries that weigh over 150 pounds. Either system can now be equipped with true UPS functionality – available at anytime the “grid” power goes down.

“We are very excited to be demonstrating the XRT and N-Gen products at the upcoming ShowStoppers CES show,” said Jack Peterson, VP of Sales and Marketing at Jadoo. “Our commercial success with this product line is a testament to the Jadoo Power team’s commitment to deliver the highest quality, best value fuel cell products available today. Providing critical power support for emergency preparedness, law enforcement, and other off-grid applications is our company mission and to be recognized for these efforts is outstanding.”

## **About Jadoo Power Systems**

[www.jadoopower.com](http://www.jadoopower.com)

Jadoo Power Systems, Inc. is a market-focused company that develops and sells next-generation, portable energy storage and power generation products. Jadoo is financed by Mohr Davidow Ventures, Venrock Associates and Sinclair Ventures, a wholly owned subsidiary of Sinclair Broadcast Group, Inc.
