JADOO POWER NAMED ONE OF TOP 100 'GREENTECH' COMPANIES

FOLSOM, Calif., Sept. 10, 2007 – Jadoo Power Systems Inc., the leading supplier of portable fuel cell systems, has been named one of the top 100 greentech companies in the country by AlwaysOn, a leading online network for technology and innovation.

“With this list of the hottest private companies in greentech, we highlight the game-changing players that are making it possible and profitable for big businesses to go green,” AlwaysOn says of the companies. “These innovators are transforming the global energy, water, agriculture, transportation, construction, manufacturing, and resource recovery establishments – all trillion-dollar industries.”

To date, \$6.4 billion has been invested in greentech companies, making the sector the third most popular for venture capitalists, according to AlwaysOn.

“Our company offers a product that is better for our clients and better for our environment,” said Jadoo Power CEO Lee Arikara. “We’ve worked hard to design and manufacture fuel cell power systems and energy storage devices that exceed our clients requirements. We are proud to make this list, which reinforces our role as a leader in the greentech industry.”

All GoingGreen 100 winners will be honored at the upcoming “GoingGreen” summit at the University of California, Davis, Graduate School of Management being held this week (September 10-12) at the Mondavi Center for the Performing Arts on the UC Davis campus.

The GoingGreen 100 award for Jadoo Power is listed on AlwaysOn at <http://aboutao.goingon.com/permalink/post/18632> and will be featured in the fall issue of AlwaysOn’s print magazine.

About Jadoo Power Systems

Jadoo Power Systems, Inc. develops and sells next-generation, energy storage and power generation products for the portable and mobile power markets. The company’s patented interface technology combined with its modular architecture enables the integration of advanced fuel cell and fuel technologies. The company’s numerous product awards include a 2007 “CES Showstopper” and an Electronic Products Magazine “Product of the Year” for 2006. For more information, please visit www.jadoodpower.com.
