

more power,
more possibilities.™

FillPoint™ Refill Station

The FillPoint is a fully automated, high-performance refill station designed specifically for refilling the N-Stor fuel canisters. The FillPoint is a four-port random-access unit where N-Stors can be inserted or removed at any time, regardless of refill status. The microprocessor-based controller tracks the refill progress of each canister individually and automatically reports progress via the state-of-fill display.

Easy to Use

A simple insert-and-twist connection refills the canisters quickly and safely.

On Board Intelligence

Accurate state-of-fill information display.

Rapid Refill

Refills four N-Stor 130 fuel canisters simultaneously in less than an hour.

FillPoint™ Refill Station
