

more power,
more possibilities.™

N-Gen™ Fuel Cell Power Unit

The N-Gen fuel cell power unit is a 12 V DC, 100 W PEM fuel cell engine. The unit can supply power to a variety of devices and can be adapted for DC requirements.

It converts the surrounding air from the atmosphere and hydrogen from the N-Stor fuel canister into electricity.

Easy To Use

Twist-in, refillable and reusable fuel canisters create a portable, simple way to meet power needs.

Predictable Power

Get the same runtime everytime without the memory or self-discharge many batteries have.

Compact and Lightweight

Power without the grid.

PRODUCT SPECIFICATIONS:

- Regulated 12 VDC
- 100 W continuous net output
- 720 W-hrs. (H-Stor)
- Startup Time: <2 seconds
- Unit size: 4.3" w x 7.5" h x 4.3" d
- Weight: 5.1 lbs. (without fuel)
- Exhaust: water vapor—zero GHG emissions
- State-of-fill display on unit
