

more power,
more possibilities.™

Commercial Products for Specialized Applications

Jadoo Power's specialty products meet the needs of a variety of applications with power requirements from 100 W to 500 W.

These products are based on PEM fuel cell architecture and provide a full power system that provides steady, predictable power without environmental pollutants.

The power system uses a standard AC/DC interface for connection to many devices (*see the broadcast camera shown here*) providing grid-free, electrical power that lasts twice as long than conventional batteries.

Broadcast Camera with the
N-Gen™ Fuel Cell

FillPoint™ Refill Station

N-Gen™ Fuel Cell

N-Stor™
Fuel Canisters

XRT™ Extended
Runtime Adapter

THE ADVANTAGES OF OUR FUEL CELL SOLUTIONS INCLUDE:

- Environmentally friendly—zero GHG emissions
- Long and continuous runtime—out-performing batteries every time
- Predictable power
- Full solutions—fuel cell, fuel, refill stations
- Rapid power-up and refill
- State-of-fill display
- A wide range of solutions from 50 W to 500 W
- Long “shelf” life—can remain in standby for years

OTHER APPLICATIONS:

- Any application using batteries and a standard AC/DC interface
- Broadcast Camera—the Jadoo Power N-Gen fuel cell replaces a standard “brick” battery with half the weight and twice the runtime
- FillPoint Refill Station
- N-Gen Fuel Cell
- N-Stor Fuel Canisters
- XRT Extended Runtime Adapter
